

Fly the Aircraft First

NTSB accident data indicates that pilots in high stress situations who become distracted have a tendency to lose control of their aircraft and crash, often fatally. This presentation emphasizes maintaining proper perspective and prioritizing keeping the aircraft under positive control to lessen the likelihood of loss of control issues. FLY THE AIRCRAFT FIRST is the hallmark of an excellent pilot. This may be accomplished through training, discipline and leadership.

This is a one-and-a-half-hour program.

Directions: Parking is available in the lot west of the terminal. Those flying in may park on the east ramp opposite the terminal.
